Professional Summary

Java Software Engineer with 1 year experience in enterprise applications using Java/J2EE, Spring Boot, Spring MVC, Hibernate, JPA, and REST APIs. Expert in microservices architecture, AWS cloud deployment, CI/CD automation, and GenAI-assisted development. Hackathon winner with experience seeking Software Engineer.

Technical Skills

Languages & Frameworks: Java 8/11, J2EE, Spring Boot, Spring MVC, Hibernate ORM, JPA, REST API, Microservices, Angular 18, JavaScript, TypeScript, Python, Linux, Shell Scripting
Databases: MySQL, PostgreSQL, SQL Server, Database Design & Optimization
Cloud & DevOps: AWS, Docker, Jenkins, Git, GitHub, Maven, Artifactory, CI/CD
Testing & Tools: JUnit, TDD, Postman, Grafana, Kibana, JIRA
GenAI & Methodologies: GitHub Copilot, ChatGPT, GPT models, Anthropic Claude — Agile Scrum, SOLID Principles, Design Patterns (Factory, Singleton, MVC), OOAD

Professional Experience

Software Engineer

Aug 2024 – Aug 2025

Cisco Pvt. Ltd., Bangalore, Karnataka

Full-Time

- Winner of WebEx Playtime Hackathon for innovative feature development driving user engagement
- Developed production-grade RESTful APIs using Spring Boot, Spring MVC, Hibernate, JPA; architected microservices with Java 8 implementing SOLID principles and design patterns (Factory, Singleton, MVC)
- Built secure API endpoints with OAuth 2.0 and JWT authentication; designed optimized MySQL schemas using JPA/Hibernate ORM reducing query response time by 35%
- Integrated CI/CD pipelines using Jenkins, Git, Maven, Artifactory achieving 40% faster deployments; containerized applications using Docker
- Leveraged GenAI tools (GitHub Copilot, ChatGPT) for code generation improving productivity by 30%; implemented TDD with JUnit achieving 85%+ code coverage
- Reduced system downtime by 25% through Grafana, Kibana dashboards; analyzed SIP, VoIP, DNS-level logs resolving complex issues in Agile Scrum environment

Key Projects

JiraX AI Full-Stack AI Project Management Engine | React 19, FastAPI, Gemini 3 Flash, Java Spring Boot, Python2025

- Engineered a prototype using React 19, FastAPI, and Gemini 3 Flash to automate GitHub repo analysis, visual QA auditing, and load-balanced sprint planning
- Architected a production roadmap transitioning from a monolithic prototype to a Microservices model using Java Spring Boot for core logic and Python for AI inference
- Live Project:** LIVE-LINK

Healthcare Medicine E-Commerce Platform | Java, Spring Boot, Spring MVC, Hibernate, Angular, MySQL, AWS, Docker, Jenkins2024

- Built full-stack medicine delivery app with secure payment gateway integration for users
- Developed 20+ RESTful APIs using Spring MVC/Hibernate for user management, inventory, orders, payment processing adhering to security standards
- Deployed microservices on AWS EC2 using Docker with Jenkins CI/CD achieving zero-downtime releases

Travel Booking Application | Java, Spring Boot, Angular, MySQL, REST API, JavaScript, TypeScript2024

- Developed multi-mode booking platform (cabs, autos, buses) using Spring Data JPA for complex database operations
- Created RESTful APIs for booking, authentication, payment with comprehensive Postman testing applying MVC design pattern

Education

Bachelor of Engineering in Computer Science

2023

College of Engineering & Technology, Akola, Maharashtra

CGPA: 8.42/10.0

Certifications & Achievements

Certifications: Full Stack Java Development (Cisco & Simplilearn) — Cisco DevNet Associate — CCNA — Cloud Computing (Coursera)

DSA Profile: 150+ problems solved on LeetCode, GeeksforGeeks, HackerRank — Strong in arrays, trees, graphs, dynamic programming

Additional: Indian Citizen — Immediate joiner — Open to relocate to Bangalore — Languages: English, Hindi, Marathi
